

July 7, 1960

Dr. E. P. Abraham  
Sir William Dunn School  
of Pathology  
University of Oxford  
England

Dear Dr. Abraham:

You may certainly reproduce the drawing referred to in your letter of 28 June. Perhaps the series of photographs which are presented in my paper in the Journal of Bacteriology, Volume 75, pages 143 - 160, 1958, might be even more instructive. The shading in the sketch does represent the appearance under dark phase contrast.

\*

Have you seen the film which Dr. Hughes and his colleagues have put out? I thought that their representation of the effects of penicillin was most dramatic.

Yours sincerely,

Joshua Lederberg  
Professor of Genetics

\* Hughes, W. Howard, Peter N. Cardew, 1956. The Effect of Antibiotics on Bacteria. Wright-Fleming Institute of Microbiology, St. Mary's Hospital Medical School, London.

ABRAHAM, E. P.
